Hiring Team

Warewe Consultancy Private Limited

Full Stack Developer - Gurgaon

I am writing to apply for the Full Stack Developer role at Warewe Consultancy. As a Software Development Engineering Intern at Clink AI, I build and ship full-stack, production features across React, React Native, Next.js, and Node.js-backed REST APIs to 1300+ users, and I bring hands-on experience building complete SaaS platforms end-to-end - frontend to database to AI layer.

My project work directly overlaps with your stack: Echo is a full-stack B2B SaaS platform with a multi-tenant architecture and an AI support agent using LLM function calling and RAG over per-tenant knowledge bases. Vibe is a production-ready SaaS platform with a tRPC/REST API layer on Node.js, an autonomous AI coding agent, and a Docker-built containerized sandbox backed by PostgreSQL - the same combination of AI agents, containerization, and relational data your role calls for.

I am comfortable owning a feature from concept through production deployment, and I am ready to pick up the pieces of your infrastructure I have not used in production yet - MongoDB, Redis, and RabbitMQ - the same way I have picked up every other tool on my resume: by shipping with it.

Why I'm a fit for Full Stack Developer at Warewe Consultancy Private Limited:

- Built **Echo**, a full-stack **B2B SaaS platform** with **multi-tenant architecture**, **RAG pipeline**, and an **LLM-tool-calling AI support agent** exposed via **REST APIs**
- Built **Vibe**, a production-ready SaaS platform with a **Node.js/tRPC/REST** backend, an **autonomous AI coding agent**, and a **Docker**-built containerized sandbox on **PostgreSQL**
- **6-star CodeChef** (2200+ rating, peak 2212) and **1000+ DSA problems solved** — strong problem-solving foundation for owning complex systems independently
- Fast ramp-up from a deep **React/Next.js/TypeScript/Node.js** background — shipped **8+ production screens** and **400+ analytics events** at Clink AI in under a year

Sincerely,
Rajat Gangwar
