Hiring Team
Propsoch
Bengaluru, India

Dear Hiring Team,

I am writing to apply for the Frontend Engineer role at Propsoch. I bring hands-on experience building responsive, production-ready interfaces with React.js and Next.js, backed by a 6-star CodeChef rating (2200+, peak 2212) and 1000+ DSA problems solved – the analytical foundation I bring to architecture and technology decisions.

As a Software Development Engineering Intern at Clink AI, I built responsive web interfaces using React & Tailwind CSS that improved page load speed by 30%, and architected a centralized Redux store that keeps the UI in sync with REST API-driven updates. I also proactively debug production issues from Sentry crash reports to keep the codebase clean and production-ready – the same ownership mindset I'd bring to scoping and leading frontend projects end-to-end at Propsoch.

Beyond web, I've shipped a cross-platform React Native app to 1300+ users and built two production-grade Next.js/React platforms (Echo, Vibe) from scratch – covering component architecture, state management, and full-stack integration. I'm excited by Propsoch's B2C mission and ready to bring this frontend depth, fast ramp-up ability, and collaborative approach to your team.

Why I'm a fit for Frontend Engineer at Propsoch:

- **React.js & Next.js depth:** Built production interfaces with React & Tailwind CSS at Clink AI (30% page load improvement) and two full-stack Next.js/React platforms – Echo (B2B SaaS, reusable UI components) and Vibe (AI SaaS, responsive frontend) – covering architecture, state management, and scalable component design.
- **Ownership & code quality:** Diagnosed and resolved production issues via Sentry crash reports and DevTools as an SDE Intern, proactively keeping the codebase production-ready – the same rigor needed for a role owning frontend architecture end-to-end.
- **Strong analytical foundation:** 6-star CodeChef (2200+ rating, peak 2212) and 1000+ DSA problems solved (75% Medium/Hard), the problem-solving base for making sound technology decisions and mentoring junior engineers.
- **Fast ramp-up, collaborative:** Shipped a cross-platform React Native app to 1300+ users and instrumented 400+ Mixpanel events for cross-functional product decisions, with a track record of learning new stacks quickly.

Sincerely,
Rajat Gangwar
