Hiring Team

Simpli Intern

Artificial Intelligence (AI) Executive

Dear Hiring Team,

I'm writing to apply for the Artificial Intelligence (AI) Executive role. I have hands-on experience implementing **Generative AI** models end to end — **RAG** pipelines, **LLM function calling**, and **prompt engineering** — across two production SaaS platforms, backed by a strong **data structures** and problem-solving foundation.

At Echo, I built a **RAG** pipeline using **vector embeddings** and **Convex vector search** for semantic search, and developed an **agentic AI** support workflow with **LLM tool calling** and **NLP-driven** intent handling, secured on **AWS**. In Vibe, I architected an autonomous **AI agent** running an **agentic loop** of up to 15 iterations of **LLM function calling**, optimizing prompts and system-level output contracts for reliable model performance.

I'm comfortable working with **Python**, cloud platforms (**AWS**, **Azure**), and identifying actionable insights from data, and I document my findings clearly for cross-functional collaboration. I stay current on **GenAI** and **Deep Learning** advancements through daily use of tools like **Claude Code**, **Cursor AI**, **OpenAI**, and **Gemini AI**.

Why I'm a fit for Artificial Intelligence (AI) Executive at Simpli Intern:

- Built a **RAG** pipeline with **vector embeddings** and semantic search (Echo), and an autonomous **LLM-agent** loop with **function calling** and prompt-engineering optimization (Vibe) — both production SaaS platforms
- Implemented voice-assistant/**conversational AI** integration (**Vapi**) alongside **AWS-secured** backend infrastructure
- 6-star CodeChef (2200+ rating, peak 2212) and 1000+ DSA problems solved — strong **data structures** and analytical foundation for **AI/ML** work
- Fast ramp-up ability: consistently picks up new **AI** stacks and frameworks (**RAG**, agentic workflows, vector search) across every project

Sincerely,

Rajat Gangwar
