Hiring Team

Kuku FM

Bengaluru, Karnataka, India

I am writing to apply for the Frontend Developer role (Job ID 395432) at Kuku FM. I bring 1+ years of professional experience building fast, responsive, user-facing products with React and JavaScript, backed by a 6-star CodeChef rating (2200+, peak 2212) and 1000+ DSA problems solved.

As a Software Development Engineering Intern at Clink AI, I build and maintain responsive React and React Native interfaces, translate designs into reusable components, and integrate frontend applications with REST APIs and backend services in a fast-paced, product-focused environment. I have architected a centralized Redux store for API-driven state sync, improved web page load speed by 30% with React and Tailwind CSS, and debugged production UI issues end-to-end using DevTools and crash reports.

Outside work, I have shipped multiple full-stack platforms on React and Next.js, working across component design, state management, and API integration. I am comfortable with TypeScript, Redux and Context API, Next.js, and Git-based workflows, and I am excited to bring that speed and ownership to Kuku FM's storytelling platform.

Why I'm a fit for Frontend Developer at Kuku FM:

- **React & JavaScript in production:** Built responsive web interfaces with React & Tailwind CSS (30% faster page loads) and a cross-platform React Native app shipping 8+ screens to 1300+ users, as an SDE Intern at Clink AI.
- **State management & API integration:** Architected a centralized Redux store with shared state slices auto-syncing UI on API-driven updates; built full-stack projects (Vibe, Echo) integrating REST/tRPC APIs end-to-end with React and Next.js.
- **Strong CS & algorithmic foundation:** 6-star CodeChef (2200+ rating, peak 2212) and 1000+ DSA problems solved (75% Medium/Hard) — the problem-solving and debugging rigor this role needs.
- **Fast ramp-up, product-focused mindset:** Shipped multiple production-grade React/Next.js platforms end to end while ramping quickly on new tools and codebases, ready to contribute from day one in a fast-paced product team.

Sincerely,

Rajat Gangwar
