Hiring Team

Infoskaters Technologies Private Limited

AI Developer

Dear Hiring Team,

I'm writing to apply for the AI Developer role at Infoskaters Technologies. I have hands-on experience developing and integrating **AI-powered chatbots** and **automation** solutions using **Python**, **Generative AI**, and **LLMs** across two production SaaS platforms.

At Echo, I built an AI-powered chatbot and voice-assistant platform with a **RAG** pipeline, **LLM tool/function calling**, and **API** integrations, testing and optimizing prompts for reliable model performance. In Vibe, I architected an autonomous **AI agent** running an **agentic loop** of up to 15 iterations of **LLM function calling** to test, execute, and self-correct code via **OpenAI's** APIs.

I'm comfortable working with **Python**, **REST APIs**, and evaluating LLM outputs, and I stay current on emerging Generative AI technologies through daily use of tools like **Claude Code**, **Cursor AI**, **OpenAI**, and **Gemini AI**. I also have working exposure to **LangChain** for document-based AI pipelines.

Why I'm a fit for AI Developer at Infoskaters Technologies:

- Built **AI-powered chatbots** with **RAG** and **LLM tool calling** (Echo), and an autonomous **LLM-agent automation** loop with **API integration** (Vibe) — both production SaaS platforms
- Hands-on with **OpenAI APIs**, **prompt engineering**, and testing/optimizing AI applications across 6+ Zod-typed tool integrations
- 6-star CodeChef (2200+ rating, peak 2212) and 1000+ DSA problems solved — strong problem-solving foundation for **AI/ML** work
- Fast ramp-up ability: consistently picks up new **AI** stacks and frameworks (**RAG**, agentic workflows, **LangChain**) across every project

Sincerely,

Rajat Gangwar
