Hiring Team

Enlight Now Healthcare Pvt Ltd

Fullstack Developer (Python, Django, Next.js)

I'm writing to apply for the Fullstack Developer role at Enlight Now Healthcare. As a Software Development Engineering Intern at Clink AI, I build complete features end-to-end — Next.js/React frontends, REST APIs, and PostgreSQL-backed data layers — and I bring strong Python fundamentals alongside a genuine interest in deepening my Django experience.

My project work reflects the frontend and API design range this role needs: Echo and Vibe are both full-stack platforms built on Next.js with REST APIs, PostgreSQL databases, and secure, structured architecture — Echo in particular is a multi-tenant B2B SaaS platform, directly relevant to building secure, scalable systems. I also bring a genuine mentoring track record, having trained 100+ students in DSA and technical skills alongside my day-to-day engineering work.

I bring strong problem-solving fundamentals (a 6-star CodeChef rating and 1000+ DSA problems solved), hands-on REST API and database design experience, and a fast ramp-up track record — I'm comfortable deepening my Django experience quickly to fit this team's stack.

Why I'm a fit for Fullstack Developer at Enlight Now Healthcare:

- Built Echo and Vibe — full-stack Next.js platforms with REST APIs, PostgreSQL databases, and secure multi-tenant architecture
- Strong data structures and algorithms fundamentals, backed by a 6-star CodeChef rating (2200+, peak 2212) and 1000+ DSA problems solved (75% Medium/Hard)
- Genuine mentoring experience — trained 100+ students in DSA and resume building
- Proven fast ramp-up track record — shipped 8+ production screens and 400+ analytics events within a single year

Sincerely,

Rajat Gangwar
